

K-Love is an encouraging station and gives many of us a wonderful way to start and end our days. It would be unfortunate to lose this station when there are so few stations like it on the air. I listen to it and it's partner Air-1 exclusively. If these stations were to be removed I would be left with nothing on the air worth listening to. I would hate to see the negative affect it might have on our community if K-Love were displaced by other programming. The world news, media, and celebrities are very negative and disheartening. Our community needs the positive reinforcement that K-Love offers. No one wants to wake up everyday to gloom and doom, that's why my radios are always tuned to K-Love. The public is positively affected by this station in many ways. Having encouraging radio on in your car keeps stress levels way down. Knowing that there are people there to pray for me makes my day. We have a more Peaceful community based on the encouragement that many of us get from K-Love radio stations. Even if the entire population does not listen, there is no doubt that just one person will affect many throughout the day and I am a better person to be around when I have my positive, encourageing K-Love to listen to. Please do not replace it with the same negative stuff that is on all the other stations. We have so much darkness around us. We need the light of K-Love. Thank You, Casey Finnestad
